The features and compact size for truck mount equipment

Arimitsu integrates proven design features into truck mount pumps.

Arimitsu offers a superior combination of performance and durability in a compact pump engineered for the demands of truck mount equipment. Pumps that can operate at high temperatures and run dry, both critical to the success of your equipment.

- High temperature seals are standard
- Run-dry capable seals are standard
- Compact size fits into tight enclosures
- Excellent suction, dry prime capability
- Efficient design reduces power consumption
