QUALITY

Do you have a crowded, noisy equipment room at your car wash?

The performance and design of Arimitsu Pumps provide extended service life, greater performance, and a quieter equipment room in a compact pump.

Functional Design

Our Model 516 has multiple outlet ports that eliminate excess plumbing by allowing direct mounting of regulators, gauges, accumulators and discharge hoses without additional fittings.

- Service
- Parts

"Prior to installation of new equipment at my site, I ordered Arimitsu Model 516 pumps to replace the brand of pumps that came standard on my new pump stands. I removed the other pumps and will probably sell them on the internet."

- Pat, KY.
